

A'liner LED Lights

Many Avans have incandescent globes in their lights . These use quite a lot of energy and get hot. If you want to change to energy efficient LED here's how you can.

You can buy LED globes in some Auto shops But this idea is neater and more efficient

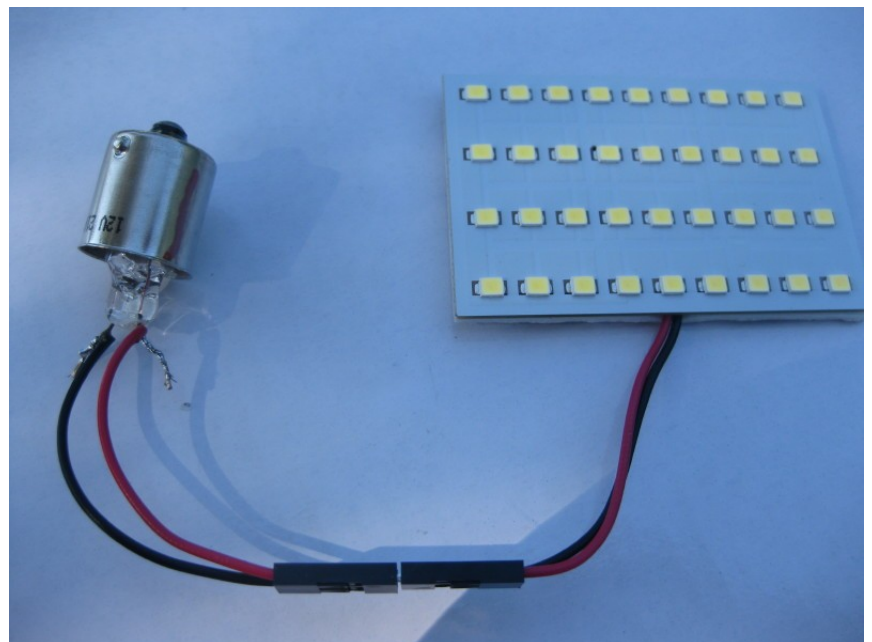

The panel is from Jaycar. ZD0589 36xLED Kit 450 lumens. \$14.95

The leads are soldered to the filament supports of the redundant incandescent bulb.

The connection of the wires to the filament supports is encased in Selleys Knead-it.

The LED panel was fixed in place with clear silicone.

ZD0585 21xLED Kit 260 lumens \$8.75 was used for the low light. If you don't use the low light
